PERSONAL PROJECTS

Hand Tracking Project

- In my 4th Semester I worked on Hand Tracking Module and developed a python code that can open any app or Game according to your choice and then control that with the help of your Hand Gestures. i.e. Open Subway Surface game and control its character with the movement of Hand.

Motion Detection Project (2023)

- I also worked on the motion detection project. It was also related to the field of AI .I used python language in this project.
